AUTHOR	van Schalkwyk, Johanna H.; And Others
TITLE	Degrees and Diplomas Conferred upon Blacks by South African Universities: 1970-1980. Report 0-300.
INSTITUTION	Human Sciences Research Council, Pretoria (South Africa).
REPORT NO	ISBN-0-7969-0514-2
PUB DATE	87
NOTE	489p.; Dutch abstract provided.
AVAILABLE FROM	Human Sciences Research Council, Private Bag X41, 0001 Pretoria, South Africa.
PUB TYPE	Reports - Descriptive (141) -- Statistical Data (110)
EDRS PRICE	MF02/PC20 Plus Postage.
DESCRIPTORS	Academic Achievement; *Black Achievement; Black Education; *Black Students; *College Graduates; *Degrees (Academic); Foreign Countries; *Higher Education; Minority Groups; National Surveys; Postsecondary Education; Statistical Surveys
IDENTIFIERS	*South Africa

ABSTRACT

The computerized data on degrees and diplomas earned by South African blacks were classified by specific faculties and fields of specialization, with information given on bachelor's, honors, master's, and doctoral degrees, and on undergraduate and postgraduate diplomas. Data are reported by field of study (social sciences, theology, law, physical education, etc.) and by sex as well. Information was gathered from the programs of the graduation ceremonies at the various universities and from the annual reports of the Department of National Education, statistics given to this department by the universities, annual reports from the Department of Education for Blacks 1971-1977, and annual reports from the Department of Education and Training 1978-1981. Some of the conclusions are that the number of Blacks registered at the South African universities increased from 1970 to 1980, with the number of diplomas and degrees awarded to them also increasing steadily. The analysis also shows that the number of female graduates declined as the level of study rose (though the percentage of women rose in respect to the different degrees). The most popular field of study during that time was the arts. The bulk of the document consists of extensive data tables and graphs. (SM)

PREFACE

In view of the shortage of trained high-level manpower and the need for careful planning to ensure its optimal utilization, the different labour sectors periodically require information on available and potential high-level manpower. This research was conducted in order to fulfil the above need, particularly since most of the RSA's high-level manpower comes from the ranks of people with university training.

The research on graduation trends in respect of Blacks at South African universities and on the provision of high-level manpower can also supply the information that guidance teachers require to make meaningful vocational and study information available to pupils.

A further aim of this report is to provide for the particular needs of researchers and institutions in view of the frequent requests for information inter alia on graduation trends that the HSRC receives.

Because of the important role played by professionally trained people in respect of a country's productivity, there is a continuous need for up-to-date information on the manpower situation. It has therefore been decided to review and update this report every five years.

7.6 GRAPHIC REPRESENTATION OF THE TOTAL NUMBER OF POSTGRADUATE DIPLOMAS AWARDED IN EDUCATION AND PHYSICAL EDUCATION: 1970-1980 285

7.7 GRAPHIC REPRESENTATION OF THE TOTAL NUMBER OF POSTGRADUATE DIPLOMAS AWARDED IN LAW: 1970-1980 291

7.8 GRAPHIC REPRESENTATION OF THE TOTAL NUMBER OF POSTGRADUATE DIPLOMAS AWARDED IN SOCIAL SCIENCES: 1970-1980 292

SAMEVATTING

Die doel met die ondersoek was om 'n analise te maak van verskeie aspekte van die grade en diplomas wat deur Swartes, gedurende die jare 1970 tot 1980, aan die onderskeie Suid-Afrikaanse universiteite verwerf is.

Die data van die Swart graduandi is gerekenariseer en die verskillende grade en diplomas op die onderskeie studievlakke is geklassifiseer volgens bepaalde fakulteite en spesialiseringsrigtings. Die groeikoers ten opsigte van die getal grade en diplomas in die verskillende fakulteite is, waar moontlik, aangedui.

Met betrekking tot die geslagsamestelling is gevind dat die persentasie vroue 'n stygende tendens toon betreffende die onderskeie grade. Uit die gegewens blyk dat die vroulike graduandi met gevorderdheid van studie egter proporsioneel afneem.

Gedurende die tydperk 1970 tot 1980 was lettere en wysbegeerte die gewildste rigtings wat eerste baccalaureus- en magistergrade betref. Die hoogste persentasie honneurs- en doktorsgrade is in opvoedkunde en liggaamlike opvoedkunde behaal.

Die totale getal grade en diplomas wat jaarliks toegeken is, het geleidelik toegeneem van 1970 tot 1980. Die gemiddelde groeikoers ten opsigte van die onderskeie studievlakke was soos volg:

- . eerste baccalaureusgrade 13,40 %
- . tweede baccalaureus- en honeursgrade 16,23 %
- . magistergrade 25,89 %
- . doktorsgrade 0,00 %
- . voorgraadse diplomas 4,00 %
- . nagraadse diplomas 13,90 %

ABSTRACT

The aim of the investigation was to make an analysis of different aspects of the degrees and diplomas obtained by Blacks at the various South African universities during the period 1970 to 1980.

The data in respect of the Black graduates were computerized and the different degrees and diplomas on the various study levels were classified according to specific faculties and specialization fields. The growth rate in respect of the number of degrees and diplomas in the various faculties (where possible) was indicated.

With regard to the sexual composition it was found that the percentage of women shows a rising trend with respect to the different degrees. From the data it appears that there was a proportional decline in the number of female graduates as the level of study rose.

During the period 1970 to 1980 arts and education were the most popular fields with regard to first Bachelor's and Master's degrees. The highest percentage of Honours and Doctor's degrees was obtained in education and physical education.

The total number of degrees and diplomas awarded annually increased progressively from 1970 to 1980. The average growth rate in respect of the different study levels was as follows:

- first Bachelor's degrees 13,40 %
- second Bachelor's and Honours degrees 16,23 %
- Master's degrees 25,89 %
- Doctor's degrees 0,00 %
- undergraduate diplomas 4,00 %
- post-graduate diplomas 13,90 %

1. THE CONTEXT OF THE INVESTIGATION: STATEMENT OF PROBLEM, AIM, CONCEPT ELUCIDATION, COLLECTION OF DATA, METHOD OF ANALYSIS, STUDENT NUMBERS AND REVIEW OF GRADUATION

1.1 AIM

The aim of this investigation is to provide an indication of trends in the awarding of degrees and diplomas to Blacks by South African universities during a particular period (1 July 1970 to 30 June 1981). No projections were made on the basis of the observed trends in view of the largely unpredictable nature of the future economic, political, social, cultural and technological situation.

1.2 CONCEPT ELUCIDATION

First Bachelor's degrees refer to those degrees that can be attained with matriculation exemption or an equivalent qualification as entrance requirement. Where a first Bachelor's degree or an equivalent qualification is an entrance requirement for a further Bachelor's degree the latter is regarded as a postgraduate or second Bachelor's degree, for example B.Ed. (Education), B.D. (Theology) and LL.B. (Law) (see 3 for further particulars). It should also be noted that the Doctor's degrees in 5 include all D. degrees as well as Ph.D., D.Phil. and D.Litt. et Phil. degrees.

Diplomas awarded by universities are divided into two groups viz. undergraduate diplomas and postgraduate diplomas. An undergraduate diploma can be attained by anyone with a senior certificate or an equivalent qualification. A postgraduate diploma however, can be attained only by someone holding a Bachelor's degree or an equivalent qualification. In this report the word diploma includes the term certificate.

The different degrees and diplomas mentioned in the report are classified according to faculties, for example the arts, medicine and education. The particular degrees and diplomas awarded in each faculty are indicated as well as the fields of specialization. In the Faculty of Arts for instance, the B.A., B.Bibl. and B.Mus. degrees include a general field of study or specialization in fields such as librarianship, drama and music.

In view of the fact that the various universities differ as regards the degrees and diplomas offered in a specific faculty (for example the degree in nursing is offered in the Faculty of Arts by some universities, while other universities offer the degree either in the Faculty of Science, the Faculty of Social Science or in the Faculty of Medicine), the HSRC has resorted to its own system of classification. This may differ from that of some universities.

Because most of the students only received their degrees or diplomas at the beginning of the year following the year in which they completed the course, a statistical year extending from 1 July to 30 June of the following year was used throughout in this report. The year 1970 therefore means the year from 1 July 1970 to 30 June 1971.

1.3 COLLECTION OF DATA

The first sources of information were the programmes of the graduation ceremonies of the different South African universities. Since neither sex nor population group is indicated in these programmes, the address lists of the universities were subsequently consulted (where the sex and in most cases the population group are indicated when more than one population group is involved). In a number of doubtful cases and where the population group was not indicated residential addresses were used as a guideline.

The annual reports of the Department of National Education as well as the statistical returns submitted to this Department annually by the universities, the annual reports of the Department of Education for Blacks 1971-1977 and those of the Department of Education and Training 1978-1981 were used as a further means of control.

1.4 METHOD OF ANALYSIS

In order to determine graduation trends in particular fields of study and professions, the particular data of the universities over a period of 11 years were analysed separately and tabled collectively. The data were subsequently scrutinized from various angles.

1.5 INCREASE IN THE NUMBER OF UNIVERSITY STUDENTS

The data gathered in this investigation reveal that an increasing number of Blacks are studying at universities. The number of students increased from 1 894 in 1960 (10:73) to 4 487 in 1970 and to 18 339 in 1980, which indicates that within two decades ten times more Blacks registered at South African universities. As regards sexual distribution there was a marked structural change. In 1960 a total of 175 female students enrolled, which constituted 9,2 % of the number of students compared to 6 148 or 33,5 % of the number of students enrolled in 1980.

1.6 REVIEW IN RESPECT OF GRADUATION

As in the past, the arts was the most popular field of study, During the survey period the B.A. degree was awarded to 2 105 men and 700 women, and the B. Mus. degree to one man. In social science 224 men and 509 women obtained a B.A. degree with specialization in social work and two men with specialization in police science.

The number of first Bachelor's degrees awarded in medicine and health sciences during the survey period increased considerably since the previous decade. From 1970 to 1980 405 first Bachelor's degrees were awarded in medicine and allied disciplines. The largest group, namely, 240 men and 40 women were awarded the M.B.Ch.B. degree. In contrast, 132 persons (of whom 20 were women) had received this qualification in the previous decade (10:72). The percentage of women qualifying in medicine and health sciences (Table 2.6) increased from 18,2 % in 1970 to 52,5 % in 1980. This upward trend can be attributed to the increase in the number of first Bachelor's degrees (Table 2.6.2) in the medical auxilliary services, such as nursing, physiotherapy and optometry, awarded to women from 1975 to 1980. The average growth rate for women in respect of the number of first Bachelor's degrees in medicine and health sciences was 38,78 % in comparison with 18,22 % for men (Table 2.6.1).

The data in respect of science and applied science show an upward trend from 1970 to 1980. In 1970 27 candidates were awarded the B.Sc. degree and two the B.Sc. degree in Pharmacy. In 1980 67 B.Sc., six B.Pharm., two B.Sc. (Eng), 12 B.Agric. or B.Sc.Agric. degrees and one B.Sc. (Q.S) (88 degrees in all) were awarded. This was slightly more than four times the number awarded in 1970 (Table 2.2).

In 1977 the first Bachelor's degree, B.Ped./B.Paed. was awarded in education. The number of such degrees increased from 14 (eight to men and six to women) in 1977 to 33 (15 to men and 18 to women) in 1980 (Table 2.12.2).

The number of first Bachelor's degrees awarded in law (Table 2.13) (excepting the degree LL.B.) and in commerce and administration (Table 2.7) increased steadily during the survey period. The number of degrees awarded in law and in commerce and administration increased respectively from six and ten in 1970 to 78 and 75 in 1980.

In respect of Honours and second Bachelor's degrees it was found that the arts with 307 Honours degrees (Table 3.2) and education with 306 B.Ed. degrees (Table 3.10.2), were the most popular fields of study.

Of the 139 Master's degrees awarded in the period 1970-1980 38 were in the arts, 36 in science, 25 in social science, 24 in education and three, five and eight respectively in town and regional planning, theology and commerce and administration (Table 4.2). As to the sexual distribution the situation remained more or less the same as during the previous decade when only three (7,1 %) of all the Master's degrees awarded went to women (10:90). In the survey period 11 (7,9 %) out of 139 were awarded to women (Table 4.1).

Twenty-four doctorates, 12 of which were in education, six in the arts, four in social science and one each in science and in law, were awarded in the period 1970 to 1980 (Table 5.2).

Almost fifty per cent (49,36 %) of all undergraduate diplomas (Table 6.2) and the vast majority (88,71 %) of all postgraduate diplomas (Table 7.2) were awarded in education.

8. BRIEF REVIEW OF THE INVESTIGATION

This study is an analysis of trends in the awarding of degrees and diplomas to Blacks by South African universities during a particular period.

Apart from first Bachelor's degrees, attention was paid to Honours degrees (including postgraduate Bachelor's degrees), Master's and Doctor's degrees as well as undergraduate and postgraduate diplomas. A number of faculties were distinguished in respect of each of the above qualifications, and the different fields of study (degrees and diplomas) as well as the fields of specialization in each of the faculties were discussed separately.

The number of Black students registered at South African universities increased from 4 487 in 1970, of whom 668 (14,9 %) were women to 18 339 in 1980, of whom 6 148 (33,5 %) were women (Table 2.1.2). The number of degrees and diplomas awarded to Blacks every year increased steadily during the survey period, in respect of both the total number of students and the different levels of study (Table 8).

Attention was paid particularly to sexual distribution and the growth rate during the particular period in respect of the different faculties and (where possible) the different fields of study, fields of specialization and levels of study in each faculty. From the data it appears that there was a propor-

433

tional decline in the number of female graduates as the level of study rose. The annual average percentage of female students was made up as follows:

First Bachelor's degrees 29,8 %
Honours degrees 26,5 %
Master's degrees 7,9 %
Doctor's degrees 0,0 %

Compared with the data of the previous decade, the percentage of women however shows a rising trend with respect to the various degrees.

During the period 1970 to 1980 the arts was the most popular field of study as regards first Bachelor's (48,4 %) (Table 2.2) and Master's degrees (27,3 %) (Table 4.2) whereas for Honours and second Bachelor's degrees it was found that both the arts (26,8 %) and education (26,7 %) were popular fields of study (Table 3.2). Doctor's degrees tended to be predominant in education (50,0 %) (Table 5.2).

In conclusion it is important to note that the aim of this report was not to make a manpower analysis but to record the degrees and diplomas conferred upon Black students. The authors trust that interested parties will find this report useful.
